PROFESSIONAL SUMMARY

Computer Science student and Full Stack Developer with hands-on experience building web applications using JavaScript, React, Node.js, Express, PostgreSQL, and Prisma ORM. Experienced in building REST APIs, authentication, data modeling, and full-stack application development. Self-taught and problem-solving oriented, with a strong interest in technology and software engineering.

PROFESSIONAL EXPERIENCE

Frontend Web Developer | Hidrotap — May 2026

- Developed and optimized responsive, intuitive web interfaces using HTML5, CSS3, JavaScript, and React, ensuring high performance and fidelity to design.
- Collaborated on meeting delivery deadlines and integrating features focused on user experience.

PROJECTS

Full Stack Blog — API, Admin & Client (Node.js, Express, Prisma, PostgreSQL, JWT, Next.js, Tailwind CSS) — [GitHub](#) | [Admin \(Demo\)](#) | [Reader \(Demo\)](#)

- Architected a blog application split into 3 decoupled repositories — REST API, admin panel, and public reading frontend — communicating over HTTP with stateless JWT authentication.
- Modeled relational data with Prisma (posts, comments, likes), implemented role-based access control, and configured CORS for multiple trusted origins.

File Uploader (Node.js, Express, Prisma, PostgreSQL, Cloudinary API, Passport.js, Tailwind CSS) — [GitHub](#) | [Demo](#)

- Built a complete cloud file management and upload platform, with remote storage via the Cloudinary API and data persistence in PostgreSQL.
- Implemented secure user authentication (Passport.js/bcrypt), folder/file access control, and rigorous form validation with express-validator.

WebRTC P2P Video Chat (Node.js, WebRTC API, WebSockets) — [Demo](#)

- Developed the frontend of a real-time P2P video calling application (2-person team), integrating the WebRTC API for audio/video capture and streaming, with signaling via WebSockets; deployed on Render.

Inventory Application (Express, PostgreSQL, EJS, Tailwind CSS) — [GitHub](#) | [Demo](#)

- Built an inventory management application with Node.js, Express, and PostgreSQL, using parameterized queries to prevent SQL injection.
- Data validation with express-validator; interface styled with Tailwind CSS v4.

CV Builder (React) — [GitHub](#) | [Demo](#)

- Built a resume generator with real-time preview and PDF export, cleanly separating the form and the preview.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, C/C++, Python

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, Zustand, EJS, Passport.js

ORMs & Databases: Prisma ORM, PostgreSQL, Parameterized SQL, node-postgres (pg)

Cloud Services: Cloudinary Storage API, Multer

Tools & Environment: Git (Conventional Commits), Docker, Linux (Ubuntu), VS Code, Vercel, Render

Methodologies & Concepts: RESTful APIs, TDD, Authentication & Sessions, SQL Injection Prevention, Code Review

Languages Spoken: Portuguese (native), English (technical reading & documentation)

EDUCATION

Computer Science | Universidade Katyavala Bwila, Benguela, Angola — 10/2021 – Present

Software Engineering (Peer-to-Peer Methodology) | 42 Luanda — 06/2025 – Present

Full Stack JavaScript Track | The Odin Project (Remote) — 10/2025 – Present
